

EVAPORATED, CONDENSED AND DRY MILK
REPORT FOR JUNE 1964

July 31, 1964

PRODUCTION

EVAPORATED AND CONDENSED MILK: June production of evaporated whole milk is estimated at 202 million pounds, according to the Crop Reporting Board. This is 3 percent under a year earlier, 20 percent below the June 1958-62 average and the smallest production for the month since 1932. Production for the first 6 months of 1964 totaled 1.0 billion pounds, down 1 percent from the comparable 1963 period.

Output of canned sweetened condensed whole milk during June totaled 7.2 million pounds, off 7 percent from June a year ago, but 19 percent above average. For the January-June period, production totaled 46 million pounds, up 20 percent from the corresponding period last year.

^{1/} Revised

NOTE: Attention is called to the revisions in production of dry milk, condensed and evaporated milk for 1964 based on enumerations for 1963 which are shown on pages 9 to 11. Revised prices paid for milk to be used in the production of evaporated or canned condensed milk for 1963 will be published in a later issue.

1/ Revised

DRY MILK: Production of nonfat dry milk for human food (spray and roller process combined) in June totaled 236 million pounds, according to the Crop Reporting Board. This is 2 percent under a year earlier, but 8 percent above the June 1958-62 average. Output for the first 6 months of 1964 was 1.3 billion pounds, up 2 percent from the corresponding period last year.

Spray-dried nonfat milk production in June was 224 million pounds, 1 percent less than June 1963 but 12 percent above average. January-June production totaled 1.2 billion pounds and exceeded the corresponding 1963 period by 2 percent.

The 11.6 million pounds of roller-dried nonfat milk produced were 12 percent under June a year ago, 39 percent below average and the smallest June production of record. A total of 54 million pounds were produced during the first 6 months this year, off 5 percent from the same period last year.

June output of dry whole milk was 6.6 million pounds, 14 percent under a year earlier, 22 percent below average and the smallest June production since 1942. Production for the first 6 months of 1964 totaled 43.3 million pounds, down 10 percent from the comparable period 1963.

Output of dry buttermilk in June totaled 8.7 million pounds. This is 3 percent less than June a year ago and 1 percent under average. Production for the first half of 1964 totaled 50.7 million pounds, up 2 percent from the first half of 1963.

Dry skim milk for animal feed production totaled 1.6 million pounds, 33 percent below June last year, 39 percent below average and the smallest June production of record. Output for the January-June period totaled 8.0 million pounds, down 39 percent from the corresponding months a year ago.

STOCKS, SHIPMENTS, PURCHASES, AND PRICES

EVAPORATED AND CONDENSED MILK: Stocks of evaporated whole milk held by reporting manufacturers on June 30 totaled 208 million pounds, up 7 percent from a year earlier, but 23 percent below the 1958-62 average for the date. Sweetened condensed whole milk stocks totaled 9.6 million pounds, 23 percent larger than a year earlier, 52 percent above average, and the largest June 30 holdings since 1950.

Prices paid producers by reporting condenseries for June receipts averaged \$3.20 per hundredweight for milk testing 3.77 percent fat, or an average of 85 cents per pound of milkfat. On the basis of milkfat, prices were unchanged from May but were 2 cents a pound above June a year ago. By States, prices ranged from a high of 92 cents per pound in California to a low of 80 cents in Kentucky and Tennessee.

Reporting condenseries for which historical data are available purchased 534 million pounds of milk during June from approximately 63,000 producers. Average daily purchases per producer were 282 pounds, record high for the month, 13 percent above a year earlier, and 9 percent above average.

Manufacturers' selling prices for evaporated whole milk during June averaged \$5.93 per case of 48 14½-oz. cans. June prices were 1 cent under the previous month and 9 cents below a year earlier. By regions, prices were unchanged from May in New England, the South Atlantic and East North Central, increased 1 cent in the South Western, and declined 1 cent in all others.

DRY MILK: Total stocks of nonfat dry milk held by reporting manufacturers on June 30 totaled 129 million pounds, 6 percent below a year earlier, 20 percent below the June 30, 1958-62 average and the smallest holding for the date since 1954. Spray-dried nonfat milk stocks were 120 million pounds, off 7 percent from June 30, 1963 and 16 percent below average. Holdings of roller-dried nonfat milk were 8.9 million pounds, up 14 percent from a year earlier, but 50 percent under average. Reporting manufacturers held 6.4 million pounds of dry whole

milk on June 30, 2 percent under June a year ago and 20 percent below average. At 9.8 million pounds, stocks of dry buttermilk were 40 percent larger than June 30 a year ago but equal to the 5-year average for the date. Holdings of dry skim milk for animal feed totaled 1.3 million pounds, up 3 percent from June last year, but down 5 percent from average.

Shipments of nonfat dry milk for human food during June totaled 196 million pounds, 13 percent above May, 11 percent larger than June a year ago, and the largest shipments of record for the month. Spray-dried nonfat milk shipments totaled 189 million, up 13 percent from May and 12 percent above June 1963. The 7.1 million pounds of roller-dried nonfat milk shipped during June was up 12 percent from the previous month, but 3 percent less than a year earlier. Dry whole milk shipments amounted to 5.8 million pounds, 6 percent larger than May and 19 percent above June last year. Shipments of dry buttermilk (human food and animal feed combined) amounted to 5.5 million pounds, up 30 percent from the previous month, but 6 percent below a year earlier. Dry skim milk for animal feed shipments during June totaled 1.0 million pounds, 36 percent above May, and 49 percent above June 1963.

Manufacturers' selling prices of nonfat dry milk, spray and roller combined, during June averaged 14.60 cents per pound, compared with 14.63 cents the previous month and 14.39 cents for June a year ago. Selling prices of spray-dried nonfat milk during June were 14.62 cents per pound. This is fractionally below the previous month but 0.2 cent above June last year. Roller prices averaged 14.01 cents per pound, 0.1 cent above May and 0.3 cent above a year earlier.

Dry whole milk in all size containers averaged 32.33 cents per pound during June. This is 1.1 cents below May and 3.9 cents below June 1963. Dry buttermilk (human food and animal feed combined) averaged 13.58 cents per pound, 0.3 cent above the previous month and 0.9 cent above a year earlier.

Deliveries of nonfat dry milk to the United States Department of Agriculture during June were 70.0 million pounds. Total deliveries for the period April 1 through June 30, 1964 totaled 215.1 million pounds, compared with 345.6 million pounds in the corresponding period of 1963. On July 17 the Department held 110.6 million pounds of uncommitted supplies of nonfat dry milk.

Table 12.-Milk bought by condenseries: Quantity bought, and number of producers, June 1964, 1/

Item	Average June 1958-62	June 1963	June 1964
Milk bought from producers pounds	603,780,000	544,352,000	533,703,000
Producers number	94,000	73,000	63,000
Average per producer per day pounds	257.8	248.6	281.7
Change in purchases per producer:			
1964 from 1963 percent	xxxx	xxxx	+13.3
1964 from 5-year average percent	xxxx	xxxx	+ 9.3

1/ Reported milk purchases at those plants (or their receiving stations) with canning equipment for which historical data are available. In some periods a part or all of the milk received at such plants may be used for purposes other than the manufacture of canned milk.
